PROFESSIONAL SUMMERY

Web Application Developer skilled in JavaScript, ReactJS, NodeJS, and RESTful APIs with hands-on experience building responsive, user-focused web applications. Worked on SaaS data integrations and low-code solutions using Oracle Apex. Strong understanding of HTML5, CSS3, UI implementation, and modern JS practices. Experienced in API integration, version control (Git), and supporting packaged/SaaS workflows. Fast learner with strong problem-solving abilities and the ability to collaborate in cross-functional teams.

EDUCATION

Sastra Deemed University

B-Tech in Computer Science and Engineering with IoT and Automation

07 2021 – 06 2025

Tanjavur, Tamil Nadu

Narayana College

Pre University Education

05 2019 – 03 2021

Bangalore, Karnataka

COURSEWORK / SKILLS

- Data Structures & Algorithms
- System Design
- Web Development
- Android Development
- Operating Systems
- Database Management System (DBMS)
- Computer Networks
- OOPS Concept

PROJECTS

Machine Health Monitoring | Python, NumPy, Pandas, Matplotlib, Scikit-learn

04 2024

- Engineered a data-intensive distributed application for Machine Health Monitoring, processing high-volume vibration/voltage data using Python and data science libraries.
- Implemented ASW and WMLOF to detect abnormal vibration and voltage patterns.
- Leveraged Eventing/Streaming concepts to process real-time sensor data, ensuring high data reliability and low-latency anomaly detection.
- Optimized performance metrics (Silhouette Score) to validate clustering efficiency and anomaly separation..

Bird Intrusion Detection | MERN Stack, ESP 32, Aurdino IDE, Sensors

10 2024

- Designed a Microservice-based real-time bird detection system utilizing the MERN Stack and IoT devices.
- Implemented a high-performance MERN web application for live data visualization and monitoring, receiving streaming bird counts from the ESP32 gateway..
- Applied clean code and DDD principles during microservice development to ensure a reliable and scalable distributed application.
- Developed a real-time bird detection system that sent detected bird counts from an ESP32 to a MERN stack web interface for live monitoring and visualization.
- Programmed the ESP32 using Arduino IDE to process sensor data and communicate with the web application.

INTERNSHIP

Document IT

02 2025 – 08 2025

Data Engineering

Work from home

- * Designed and optimized high-volume SQL queries and stored procedures within SSMS, supporting efficient data retrieval for large-scale reporting services.
- * Integrated and thoroughly tested external APIs with a focus on security and reliability; practiced secure code principles to prevent known vulnerabilities.
- * Spearheaded a sample project to convert SAP data for Workday EIB/HCM integration, requiring meticulous attention to data compliance and security aspects.

Rockfort Labs Inc

02 2024 – 06 2024

Machine Learning Intern

Work from home

- * Engineered a Wellness Management System using Machine Learning models on patient data for early scoliosis detection.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, Dart, JavaScript, SQL, JavaScript, HTML5, CSS3

Developer Tools: VS Code, Aurdino IDE, SSMS, Oracle Apex, Postman, Figma, Jupyter Notebook

Technologies/Frameworks: GitHub, ReactJS, NodeJS, ExpressJS, Git, Mongo, Flutter, Machine Learning
